Art Unit: 3636

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-7 and 9, drawn to a seat belt with a printed face, classified in class 297, subclass 468.
- II. Claim 8, drawn to a method for printing a seat belt, classified in class 101.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case the process can be used to make various printed items, including articles of clothing, pictures, and various other decorative items.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, and the search required for Group II is not required for Group I, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
